

Hot Rolled Steel Profiles

Serrated Edge Flat

Product Data Sheet

Product Description

Bromford hot rolled serrated and castellated edge flats have one edge rolled with a profile.

They are most commonly used for industrial metal flooring, walkways and stair treads where the profiled edge gives improved grip to the flooring surface.

Size Range

Many combinations of width and thickness are available, within the range specified below:

Width

from 20mm up to 60mm

Thickness

from 3mm up to 10mm.

Other special profiles can be rolled within similar geometric limits.

Tolerances

Generally the same as for flats. For details request Bromford drawing.

Supply Condition

Bars are available in lengths up to 8.0 metres. Bar ends are cleanly sheared. Standard bundles are 2000 kg secured with tensioned bands. Smaller bundles available by agreement.

The standard grade is BSEN10025 S275 equivalent to ASTM A36.
